DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Objections

Claim 23 is objected to because of the following informalities: it is unclear what steps are included within a method for assessing physiological function in an individual in that there appear to be method steps in the recited structural limitations. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

⁽e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/075,217

Art Unit: 3736

Claims 1-3, 6, 7, 16, 23, 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemmen. Lemmen discloses a sensor comprising a stimulator (14, 16) and a detector (10, 12). The stimulator (14, 16) and detector (10, 12) are connected such that they are automatically positioned substantially adjacent. See col. 4.

Claims 1-6, 13, 16-19, 22, 37 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Organ et al. The reference discloses a sensor comprising a stimulator (28) shaped to fit a first anatomical site and a detector (29) shaped to fit a second anatomical site substantially adjacent to the first anatomical site. The stimulator (28) and detector (29) are connected such that they are automatically positioned substantially adjacent. See Figs. 2 and 4-6. Organ et al further teach a processor. See paragraph 45 and 46. The apparatus can be used in any region of the body. See paragraph 15. The functional "whereby" statement in claims 1-3 and 37 does not define novelty in the structure and accordingly cannot serve to distinguish. *In re Mason*, 114 USPQ 127 (CCPA 1957)(functional statement cannot serve to distinguish claims, which are not process claims, from reference since it does not define any structure).

Allowable Subject Matter

Claims 8-12, 14, 15, 20, 21 and 24-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Art Unit: 3736

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lekhtman et al teach stimulation and detection means on first and second anatomical sites.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. McCrosky whose telephone number is 703-305-1331. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max F. Hindenburg can be reached on 703-308-3130. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
